

Physician Letter

Date: [Today's Date]

Lu Hu, PhD
Department of Population Health
NYU School of Medicine
180 Madison Ave, New York, NY 10016

Dear Dr. [Physician First Name] [Physician Last Name]

Your patient, _____ (MRN# _____) may be eligible to participate in a research study being conducted by NYU Langone entitled "A Mobile Health Intervention to Reduce Diabetes Disparities in Chinese Americans".

The purpose of this research study is to learn about whether our diabetes education videos are helpful to lower blood sugar in Chinese Americans with type 2 diabetes.

An automated query of the electronic health record indicates that your patient has type 2 diabetes and their most recent HbA1c result is ≥ 7 . If these diagnoses are in error, or if your patient has other co-morbidities or special situations that do not permit participation in clinical research studies, please let me know.

If you do not object to study participation for your patient, I would appreciate if you could mention the study to your patient at your next scheduled contact. Your patient will receive a letter with information about the study, and may be contacted by research staff to determine if he or she is willing to schedule a screening visit.

If you prefer that your patient not participate, or if you have any questions about the study, please contact Dr. Lu Hu at 347-380-2416 or via email at lu.hu@nyulangone.org

Sincerely,

Lu Hu, PhD
Principal Investigator
