

Recruitment Email for Online Based Provider Survey (online-based Provider Survey)

Greetings! You are receiving this email because your practice has agreed to participate in an exciting research opportunity geared to improve hypertension and diabetes management outcomes for South Asian patients with hypertension and diabetes in Atlanta, Georgia. The New York University School of Medicine and Emory University is conducting a research project, which aims to improve blood pressure control outcomes for South Asian patients with diabetes and blood pressure through EHR-based decision-support and physician feedback interventions combined with community health worker-led self-management and coaching support.

As part of this project, we ask for 15 minutes of your time to complete an online Provider Survey. Agreeing to participate in this survey does not bind you to future participation in this project. Questions are asked about strategies used to manage hypertension and diabetes, continuity of care, and lifestyle change with patients; as well as knowledge of and use and/or consideration of use of community health workers, clinical practice guidelines and EHR-based decision supports. There is no monetary cost to complete this survey. Participation is entirely voluntary and you may withdraw anytime without penalty. Confidentiality and privacy are protected as required by law and by the policies of the Institutional Review Board at NYU Langone Medical Center and Emory University. Your name and the names of any employees at your practice will not be reported as part of this study.

If you have any questions about this study or the survey, please contact the Principal Investigator for this study, Dr. Megha Shah at megha.shah@emory.edu.

By clicking on this hyperlink, which will reroute you to the online survey, you consent to participating in the Provider Assessment survey.

You may request a paper version of this survey to complete.
