

Do you want to prevent diabetes related complications?

The research team led by Dr. Lu Hu at NYU Langone Health is conducting a study to understand whether a culturally and linguistically tailored diabetes program can help Chinese Americans manage their diabetes and prevent diabetes related complications.

Are you eligible?

- Chinese Americans above 18 years old
- Diagnosed with type 2 diabetes
- Poorly controlled diabetes (Recent HbA1c $\geq$ 7%)

Participant benefits

- Receive brief diabetes education videos
- Assistance on health-related social needs
- Receive support calls from community health workers
- \$150 gift cards upon completing all the study procedure

Study requirements

- Complete a brief survey and A1cNow Self Check at the beginning, 6 months, and 12 months later
