My name is \_\_\_\_\_. I am with the MARHABA project, Muslim Americans Reaching for Health and Building Alliances.

Thank you again for continuing to participate in this study.

MARHABA is collecting data to learn more about and respond to the issues that affect Muslim women around breast and cervical cancer screening.

We are conducting this study among Muslim female community members residing in the New York City metropolitan area. The study will consist of a survey that will collect information on knowledge, beliefs, and practices regarding breast and cervical cancer. We will also be asking you other health-related questions and your experiences while accessing health care in the US. We will also be asking you questions about your experience in the MARHABA study. Your answers and ideas will help us better understand the issues that are important to your community and enable us to improve breast and cervical cancer screening behavior among Muslim women in NYC.

The survey will take approximately 40 minutes to complete. For your time, we will be providing you with a \$25 gift card after the survey is completed. Again, the information you provide in the survey is completely confidential. Please answer the questions based on your own experience or your own opinions. There are no right or wrong answers and if at any time you are confused about a question, please let me know.

Through my faith in Allah, I can stay healthy.					
If I lead a good spiritual life, I will stay healthy.					
If I stay healthy, it's because I am right with Allah.					
Living the way Allah says I'm supposed to live means I have to take care of myself.					
Even though I trust Allah will take care of me, I still need to take care of myself.					
Allah gives me the strength to take care of myself.					
I rely on Allah to keep me in good health.					
Allah works through doctors to heal us.					
Prayer is the most important thing I do to stay healthy.					
If I stay well, it is because of the grace of the good Allah.					
It's ok not to seek medical attention because I feel that Allah will heal me.					
There is no point in taking care of myself when it's all up to Allah anyway.					
Allah and I share responsibility for my health.

An unmarried man and unmarried woman should not be alone together					
I always look for a female doctor for myself					
I have delayed seeking medical care when no woman doctor is available to see me					
Hospital gowns are not modest					
My clothing demonstrated a commitment to Islamic modesty					
Maintaining Islamic modesty is important to me
