

Tips for Addressing Challenging Behavior in Young Children

Use the MAGiC P!

BE MINDFUL

Consider if there is a need this child has that is not being met.

BE AWARE

If your buttons have been pushed, get regulated. You want to respond and not react.

BE GIVING

Consider if there is a social emotional skill you can teach the child to support behavior change.

BE CURIOUS

Remember that all behavior is communication.

BE PATIENT

Connect before you correct. Allow for logical consequences.
