

## Email to Patients

Date: *Insert date*

*Insert first and name of patient*  
*Insert patient's mailing address*

Dear *insert first and name of patient*

To improve the health of our patients, NYU Langone School of Medicine is doing a research study to better understand if a decision coaching program for Black men will improve the quality of men's decisions on whether or not to get a Prostate-Specific Antigen (PSA) test which is a type of blood test for prostate cancer.

As we had discussed earlier, this letter includes the decision aid to give you more information about prostate cancer screening.

Taking part in the study is 100% voluntary. Choosing not to take part will not affect your relationship with any NYU Langone entity and will not involve a penalty or loss of rights to which you are entitled.

**If you don't want to participate in the study you do not have to respond further.**

If you feel you have been contacted for this study in error, you may call me at, *insert coordinators phone number and email address*. If you would like to remove your name from our contact list for future research studies, please contact us by phone (1-855-777-7858) or email ([research-contact-optout@nyumc.org](mailto:research-contact-optout@nyumc.org)).

**If you would like to learn more about this study, you may call 646-501-9836.**

If you would like to confirm that this is a valid study or if you have questions or complaints about the study, you can call the Institutional Review Board at **212-263-4110**.

Sincerely,

Research Coordinator Name
