## COMPREHENSIVE RESEARCH ENGAGEMENT SURVEY TOOL:

Dear Community Steering Committee member,

An important goal of the Rapid Acceleration of Acceptable COVID Testing and Care Options for NYC Public Housing Residents (RADx NYCHA), also known as the Resident COVID Response (RCR) Initiative is to: 1) improve in our ability to engage with our community partners; 2) work together to tailor the project to meet community needs; and 3) identify key areas to facilitate a long-term participatory community initiative. We have prepared a brief survey to learn how we might do this better. Please think about your experience participating in the RADx-UP project with investigators from NYU. For the rest of this survey, please answer the questions according to your thoughts and experiences working on this project.

This survey will be anonymous and voluntary. We anticipate that your participation in this survey presents no greater risk than everyday use of the Internet. You may refuse to take part in the research or exit the survey at any time without penalty. You are free to decline to answer any question you do not wish to answer for any reason. It should take approximately 10 minutes to complete.

Your privacy is very important to us. We will take great care to protect your privacy. However, there is always a chance that, even with our best efforts, your identity and/or information collected during this study may be accidentally released or seen by unauthorized persons. Here are a few steps we will take:

- Data will be stored on protected, secure computer systems. We will limit and keep track of who can see these data.
- Anyone who can see these data will have to use a password.
- We will take steps to protect your information from others that should not be able to see it.
- When your data are shared with other researchers, they will not have information that can identify you.

You can call Principal Investigator Dr. Lorna Thorpe at 646-501-3600 with any questions about this study. If you have any questions regarding your rights as a research subject, please contact the Institutional Review Board (IRB) at 212-263-4110.

Electronic consent: I have read the above information and agree to participate:

	Please rate how <i>well</i> the partners leading the research do each of the following:						Please rate how <i>often</i> the partners leading the research do each of the following:					
	Poor (1)	Fair (2)	Good (3)	Very Good (4)	Excellent (5)	N/A	Never (1)	Rarely (2)	Sometimes (3)	Often (4)	Never (5)	N/A
The effort incorporates factors (for example—housing, transportation, food access, education, employment) that influence health status.												
The focus is on cultural factors that influence health behaviors.												
<b>Partner input</b>												
All partners have the opportunity to share ideas, input, and leadership responsibilities and to share in the determination of the project structure.												
Plans are developed and adjusted to meet the needs and concerns of the community or patient population.												
All partners agree to take on specific tasks according to their comfort, ability, and expertise.												
All partners assist in establishing roles and related responsibilities for the partnership.												
<b>Partnership sustainability to meet goals and objectives</b>												
All partners share updates, progress, strategies, and new ideas regularly.												
A plan is in place for ongoing problem-solving.												
All partners are involved in determining next steps.												
Community-engaged activities are continued until the goals (as agreed upon by all partners) are achieved.												
All partners continue community-engaged activities beyond an initial project, activity, or study.												
<b>Co-learning, capacity building, and co-benefit for all partners</b>
