

### **Project RICE Close-Out Interview**

1. How long have you worked on this project and what was your role?
2. How do community participants view KCS (did their views change throughout the program? If so, how?)
3. How do community participants view NYU (are they aware of NYU's involvement)?
4. How do community participants view CHWs (did their views change throughout the program? If so, how?)
5. What qualities do you think make a successful community health worker? Please explain.
6. What qualities do you think it is important that CHWs share with the community members they are serving? (eg. age, gender, religion, education, occupation) Why?
7. What makes CHWs different from other health educators/outreach workers?
8. What challenges did you encounter?
  - a. In recruiting participants
  - b. In retaining participants
  - c. During group education sessions
  - d. While working on goal-setting with participants
  - e. During follow-up phone calls
  - f. During follow-up survey collection
  - g. Others?
9. What suggestions do you have to improve the following in the future?
  - a. Recruiting participants (ie. What motivates community members to participate in this program? / How can we encourage other community members to participate in this program? What are some other strategies we can try to recruit participants?)
  - b. Retaining participants (ie. How can we encourage future participants to continue with the program and not drop out?)
  - c. Group education sessions
  - d. Working on goal-setting with participants
  - e. Follow-up phone calls

- f. Follow-up survey collection
  - g. Others?
10. Do you have any feedback (or have participants shared feedback with you) on:
- a. the content presented in the sessions / Was anything missing?
  - b. the format of the sessions
  - c. power point presentations and the materials/hand-outs
  - d. specific session topics
  - e. frequency of the sessions
  - f. others?
11. Was the project effective in meeting participants' goals and expectations? Explain.
- a. What was most helpful?
  - b. What were the barriers?
12. Was the project effective in meeting KCS's goals and expectations? Explain.
- a. What was most helpful?
  - b. What were the barriers?
13. Any other thoughts about what we do to improve the program in the future?
14. Was there anything about your experience working on this project that surprised you (eg. Initial expectations, Problems encountered)
15. Would KCS be interested in integrating diabetes prevention efforts into existing programming (eg. senior centers, religious services, etc). If so, how?
16. What is the best way to disseminate results back to the community? (consider: format, communications, media)

**Final thoughts:**

Is there anything else you would like to share?
